# Dan Boterashvili

## Full Stack Developer

I am a personal trainer and visual artist turned software engineer. As a trainer I have spent countless hours working with people on a personal level helping them create lasting change in their lives. I am passionate about the intersection between human movement, creative expression, and technology. This experience has taught me to be empathetic, curious, and persistent when it comes to finding solutions to complex problems. I strive to create products and experiences that bring people together.

## Experience

**2020-10 - Current**

### Fronend Software Engineer - Team Lead
*The Coop, Remote*
- Coordinated with team of UX designers and engineers to plan, design, and document minimum viable product.
- Set goals for and created Kanban style sprint board every two weeks.
- Lead pair programming exercises during development process.
- Researched new technologies for future versions of project TUX.

**2020-07 - 2020-10**

### Software Engineering Immersive Fellow
*General Assembly, New York City, NY*
Projects:
- Fridgester - An application that provides the user recipes based off of the foods they currently have in their refrigerator. Built in HTML, CSS, and JavaScript.
- Sophia - A tool to help life long learners and polymaths organize their areas of interest and study materials. Built in the M.E.N. Stack
- Petlink - A user driven application that helps pet owners communicate about their pets behavior and symptoms. Built in the M.E.R.N Stack
- Move With Abandon - A Django web application that uses machine learning and computer vision libraries to capture the user with their webcam and draw shapes in the browser using the users joint positions.

**2016-09 - 2019-08**

### Co-Founder, Head Coach
*Grasp Wellness, New York City, NY*
- Created and implemented Grasp branding, core mission, marketing materials and online presence.
- Created and maintained a supplementary online exercise library as a bonus for all clients.
- Hired and educated personal trainers and instructors.
